**Comments concerning proposed rulemakings**

I am opposed to the changes 9.7 these change are addressed in other Commission rules. I support the use of electronic actuators as written in 9.126 and 9.143. I strongly support the use of engineered breakaways under 9.143. I believe that all cylinder cages, including forklift cylinders should be considered as adequate protection in areas not frequented by the public. I would like for the Commission to continue to except PERC CETP training as continuing education for managers. I would suggest that the Commission not adopt 9.55.
