Comments concerning proposed rulemakings

I support strengthening RRC regulations to protect water and air from being polluted by a mostly self regulating oil and gas industry in Texas. This industry makes BILLIONS of dollars and mostly refuses to use its profits to make the industry outputs safe for the public and private water sources and properties. You are not a good neighbor and you should. The public deserves better. This will not cost jobs because by cleaning up the industry you make the industry better and less wasteful. You make the industry more efficient. Its time to recognize this fact and implement rules to make the industry pay for its pollution. By doing so, you become a good neighbor. Thank you for your time.
