RAILROAD COMMISSION OF TEXAS

ORGANIZATION REPORT (P-5) SYSTEM

MAGNETIC TAPE USER'S GUIDE

TABLE OF CONTENTS

II

I. GENERAL INFORMATION

Identification

_____

Developed For: Users of Organization Report File Tape

By: Railroad Commission of Texas

System Name: Organization Report (P-5) System

Computer: IBM 2003-116

PHYSICAL TAPE CHARACTERISTICS

1600 or 6250 BPI, Channel phase encoded

IBM Standard Labels (one 80-character volume label, two 80-character leader labels and two 80-character trailer labels)

The ORGANIZATION REPORT FILE TAPE is identified by the following internal dataset name and has the listed attributes:

Dataset Name: S.ORF850   (Organization Report File Tape)

Record Length: 350

Blocking Factor: 30

Block Size: 10,500

SYSTEM DESCRIPTION

This tape provides a complete set of information available from the Railroad Commission of Texas on the Organization Report (P-5) System. This tape will provide information on all organizations that have properly filed Form P-5 with the Commission.

There are sixteen (16) records used internally by Railroad Commission personnel in the Organization Report (P-5) System. The first fifteen (15) records (Organization numbers (000001-000015) are RRC Office Designations for RRC personnel. Organization number 123456 is a test record used to train personnel. These records will not be duplicated onto the tape.

Information is placed on the tape in a manner which shows a relational structure between the various record types that can exist for a given organization. The exception is the type '1T' record, which does not relate to a particular organization, but can be used to set up a table of all valid specialty codes and activity indicators. Each organization consists of one or more of the record types described below. Each organization has at least a type 'A ' record while other records may exist when additional information is available. If a value "H", hold-mail-code, appears in any organization's 'A ' Hold-mail-code data field, this means all of the mailing addresses within this organization are invalid (e.g., 'A ', 'F', 'H ', 'J ' and 'K ' records).

I.3

RECORD TYPES AND DEFINITIONS

RECORD ID   DEFINITION

'1T'   (Specialty code/activity indicator table records) These records identify all valid
               activity indicators and spec-ialty codes currently in use by the Railroad
               Commission.

The following code types are represented by these records:

       Code Type   Definition

       ---------   -----------

       AD   This code is used internally by the Commission to identify a special
                     address used when mailing a P-5 renewal form.

       AI   ACTIVITY INDICATOR - This field shows activity in which an
                     organization may be involved. For example, organizations may be
                     gatherers of gas or condensate, or they may have oil allowables. Each
                     organization participating in these activities will have a corresponding 'U'
                     record to indicate these specific activities regulated by the Railroad
                     Commission.

               Activity Code   Description

               CSGD/G   Casinghead Gas Gatherer
               G/NOM   Gas Nominator
               G/PUR   Gas Purchaser
               GTHS/G   Gas Gatherer
               GTHS/O   Oil Gatherer
               OPRS/G   Gas Operator
               OPRS/O   Oil Operator
               GTHS/C   Condensate Gatherer
               CSGD/P   Casinghead Purchaser
               SEC/RC   This code is no longer used.

       SR   SPECIALTY CODE - This type of specialty code serves two purposes:

                     1. This code type allows for multiple addresses, that is, multiple 'F '
                     records of the same specialty code for an organization.

                     2. This code type indicates that the organization is currently
                     involved in a specific operation as defined by the specialty code.

       Note: There will not be any 'H ' district records associated with "SR" records.

Specialty Code	Description
DIRSUR	Directional Surveying Companies
GASPLT	Gas Processing Plants
OILNOM	Nominator of Crude Oil
PIPE-A	Pipeline Operators' Affiliate Co.
PIPE-L	Pipeline Operators
PLUGGR	Approved Cementer for Plugging Wells as Specified in SWR14
RECLPL	Reclaiming and Treating Plants
REFINE	Refineries and Gasoline Plants
RESPIT	Reserved Pit Cleaners
SWDP18	Skim Oil Recovery from Salt Water Disposal Sites
SWHAUL	Salt Water Haulers For Hire
TRANSP	Company Physically Moving or Storing Crude or Condensate

SN   SPECIALTY CODE - This type of specialty code indicates district addresses. "SN" does not indicate kinds of operations in which an organization may be involved. Only "AI" and "SR" types indicate kinds of operations in which an organization may be involved. "SN" allows only one address, that is, only one 'F ' record of the same specialty code per organization; however, there may be multiple district ('H ') records associated with the same specialty code.

Specialty Code	Description
CONTRL	Controls Oper. & Gather. Addresses Unless Specific Control Set
DOMSTC	Operator With Lease Used For Personal Use
GASNOM	Controls District Mailing for Gas Nominators on T-3 File
GASPUR	Controls District Mailings for Gas Purchasers on T-3 File
GATH-G	Controls Gatherer Gas Mailing Addresses
GATH-O	Controls Gatherer Oil Mailing Addresses
GATHER	Controls Gatherer Gas, Oil, Condensate Mailing Addresses
OPRATR	Controls Operator Gas, Oil, Condensate Mailing Addresses
OPRGAS	Controls Operator Gas Mailing Addresses
OPROIL	Controls Opertor Oil Mailing Addresses

'A '   (Organization information) This record contains the most commonly needed information for the organization.

'F '   (Specialty codes) These records indicate specialty mailing addresses used for specialty related correspondence. The various specialty codes are described under '1T' description.

'H '   (Specialty addresses by district) These records indicate district mailing addresses within a specialty code for an organization. The various specialty codes are described under the '1T' description.

'J '   (Field information) This record is for future use.

'K '   (Officer information) These records contain officer or agent information provided by the organization on Form P-5. There is one 'K ' record for each officer or agent.

'P '   (Remarks) This record is for Railroad Commission personnel use only. Specific reasons for filing of Form P-5 or miscellaneous documentation may be indicated.

'U '   (Activity indicators) These records indicate that the organization is engaged in specific activities regulated by the Railroad Commission. (These records are updated monthly.)

'R '   (Activity restrictions) These records indicate the type of activities an organization is restricted from participating in.

The records appear sequentially on tape in the following manner:

'1T'   All '1T' records are at the front of the tape. They are not related to specific organizations.

'A '   There will be one 'A ' record for each organization.

      'F '   (Optional) for each organization ('A ') record. May have multiple specialty code ('F ').

        'H '   (Optional) for each "SN" specialty code ('F ') record.

                May have multiple district ('H ') records with the same "SN" specialty code.

        'J '   (Optional) for each district ('H ') record.

      May have multiple field ('J ') records with the same "SN" specialty code and district.

      'K '   (Optional) may have multiple officer ('K ') records.

      'P '   (Optional) may have multiple remarks ('P ') records.

      'U '   (Optional) may have multiple activity indicator ('U ') records.

      'R '   (Optional) may have multiple activity restriction ('R ') records.

'A '   Information for the next organization.

      'F '   (Optional) for each organization ('A ') record.

.

.

"SN" Specialty Codes Algorithms

There are two types of search algorithms used to locate an "SN" specialty code's district mailing address.

> 1. Specific Hierarchical "SN" Specialty Code District Address Search. This involves seven (7) "SN" specialty codes.

> 2. General "SN" Specialty Code District Address Search. This involves the remainder of the "SN" specialty codes.

The Specific Hierarchical "SN" Specialty Code District Address Search Algorithm involves the following seven (7) "SN" specialty codes:

1. CONTRL   Controls district/field mailings unless specific control set
2. GATHER   Gatherer of gas, oil, or condensate mailing control
3. GATH-G   Gatherer of gas mailing control
4. GATH-O   Gatherer of oil mailing control
5. OPRATR   Operator of oil/and of gas wells mailing control
6. OPRGAS   Operator of gas well mailing control
7. OPROIL   Operator of oil well mailing control

These seven specialty codes are hierarchically related.

```
                          ***********
             ************   CONTRL   ************
             *          ***********              *
             *                                   *
          ************                    ************
      *******   GATHER   ***          ***   OPRATR   *******
      *    ***********    *           * ***********       *
      *                   *           *                   *
   **********    **********        **********    **********
   * GATH-G *    * GATH-O *        * OPRGAS *    * OPROIL *
   **********    **********        **********    **********
```
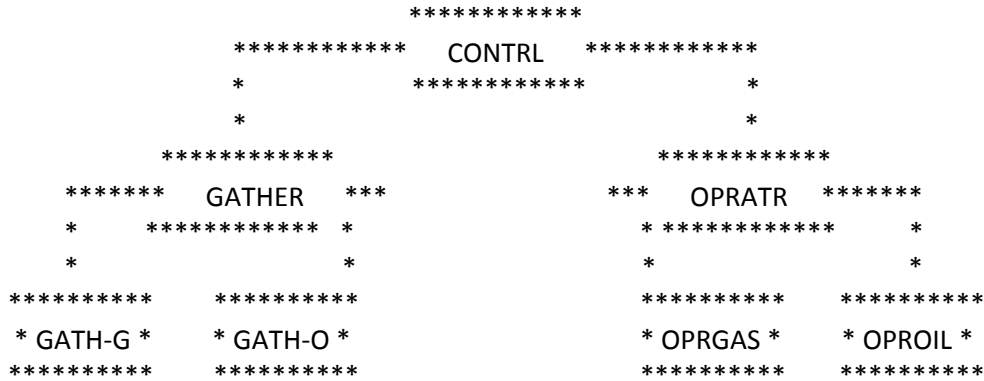

NOTE: Certain "SN" specialty codes were changed in the RRC system only. The outside sources tape contains the old codes.

OLD	NEW
CONTRL	XCONTL
OPRATR	OPERAT
OPRGAS	OPER-G
OPROIL	OPER-O

The Specific Hierarchical "SN" Specialty Code District Address Search Algorithm is as follows:

GIVEN: The operator number
                One of the seven "SN" specialty codes
                The district

1. Locate the 'A ' record that has the given operator number.

If...	then ...
'A ' record is located	go to specialty code 2
'A ' record is not located	-there is not an organization with the given operator number -end of search

2.

If...	then ...

the given "SN" specialty code is not:
  - GATH-O and
  - GATH-G
	go to specialty code 3

the given "SN" specialty code is:
  - GATH-O or
  - GATH-G
	locate the 'F ' record that has the given operator number and "SN" specialty code.

If...	then...
'F ' is located	locate the 'H ' record that has the given operator number, "SN" specialty code and district
'H ' is located	-use the mailing address on the 'H ' record -end of search

	If...	then...
(continued)	'H ' is not located	-use the mailing address on the 'F ' record -end of search
	'F ' is not located	-set the given "SN" specialty code to "GATHER" specialty code. -go to specialty code 4

3.

If...	then ...
the given "SN" specialty code is not: 　- OPROIL AND 　- OPRGAS	go to specialty code 4
the given "SN" specialty code is: 　- OPROIL OR 　- OPRGAS	locate the 'F ' record that has the given operator number and "SN" specialty code.

If...	then...
'F ' is located	locate the 'H ' record that has the given operator number, "SN" specialty code and district.
'H ' is located	-use the mailing address on the 'H ' record -end of search
'H ' is not located	-use the mailing address on the 'F' record -end of search
'F ' is not located	- set the given "SN" specialty code 　"OPERAT" specialty code -go to specialty code 5

4.

If...	then ...
the given "SN" specialty code is not: "GATHER"	go to specialty code 5
the given "SN" specialty code is: "GATHER"	locate the 'F ' record that has the given operator number and "SN" specialty code.

If...	then...
'F ' is located	locate the 'H ' record that has the given operator number, "SN"specialty code and district
'H ' is located	-use the mailing address on the 'H ' record -End of search
'H ' is not Located	-use the mailing address on the 'F ' record -end of search
'F ' is not located	-set the given "SN" specialty code to "XCONTL" specialty code -go to specialty code 6

5.

If...	then ...
the given "SN" specialty code is not: "OPRATR"	go to specialty code 6
the given "SN" specialty code is: "OPRATR"	locate the 'F ' record that has the given operator operator number and "SN" specialty code. | If...	then...
'F ' is located	locate the 'H ' record that has the given operator number, "SN" specialty code and district.
'H ' is located	-use the mailing address on the 'H ' record -end of search
'H ' is not Located	-use the mailing address on the 'F' record -end of search
'F ' is not Located	-set the given "SN" specialty code to "CONTRL" specialty code. -go to specialty code 6	

6. Locate the 'F ' record that has the given operator number, "SN" specialty code.

If...	then...
The 'F ' record is located	locate the 'H ' record that has the given operator number, "SN" Specialty code, and district
the 'H ' record is located	-use the mailing address on the 'H ' record -end of search
the 'H ' record is not located	-use the mailing address on the 'F ' record -end of search
the 'F ' record is not located	-use the mailing address on the 'A ' record -end of search

7. End of the Specific Hierarchical "SN" Specialty Code District Address

Search Algorithm.

The remainder of the specialty codes use the General "SN" Specialty Code District Address Search Algorithm.

The following is the General "SN" Specialty Code District Address

Search Algorithm:

Given: The operator number

              The "SN" specialty code

              The district

1. Locate the 'A ' record that has the given operator number.

If...	then...
'A ' record is located	go to specialty code 2
'A ' record is not Located	-there is not an organization with the given operator number -go to specialty code 4

2. Locate the 'F ' record that has the given operator number and "SN" specialty code.

If...	then...
'F ' record is located	go to specialty code 3
'F ' record is not located	-use the mailing address on the 'A ' record -go to specialty code 4

3. Locate the 'H ' record that has the given operator number and "SN" specialty code, and district.

If...	then...
'H ' record is located	-use the mailing address on the 'H ' record -go to specialty code 4
'H ' record is not located	-use the mailing address on the 'F ' record -go to specialty code 4

4. End of the General "SN" Specialty Code District Address Search Algorithm.
