Comments concerning proposed rulemakings

This weatherization rule doesn't not do enough to keep us safe. I do not live on the same grid as a hospital so WHEN another snowstorm comes, I want to know that I will be safe. I want to know that I won't be price gouged for energy/heating that I'm not receiving because the companies don't want to weatherize. We need producer to operate not just to "PREPARE" to operate when we need them the most. Companies do not care about Texan's lives, they only care about Texan's dollars. Most assuredly they will "prepare" and not ACT to save money. We also need transparency on which companies HAVE to abide by this rule. This needs to be seen and known by Texans. We need to know whether or not we are prepared!! If my local producer doesn't have to abide by this rule, then I know my region is NOT prepared. This is important and we need to know.
