**Comments concerning draft rulemakings**

i am a 64 yr old family man been in oilfield all my life working on drilling rigs along with most of my family & friends putting this new rule in place will absolutely kill our customers the small oil companys can not afford to do closed loop systems & do away with reserve pits this will put our customers out of business therefore putting small contractors outta of business creating all kinds of hardships for people of texas that depend on the oilfields of texas to feed & take care of their familys please dont let texas become a new mexico !!
