Comments concerning proposed rulemakings

Regarding notice requirements in section §5.204. Notice of Permit Actions and Public Comment Period. In subsections (a)(3)(A)(iv)-(vi), "all mineral interest owner, including non-participating interest owner, working interest owner, and overriding interest owner" should be listed as a party notified. In subsections(a)(3)(A)(iv), instead of "outermost boundary," it should be changed to read "entire boundary of the proposed geologic storage facility.

§5.206. Permit Standards. A section should be added to say the following: the injection and geologic storage of anthropogenic CO₂ shall be confined to its zone of injection.
