RAILROAD COMMISSION OF TEXAS

Oil & Gas Division | Technical Permitting

Waste Profile

Form EP - 9

(Rev. 04/29/25)

Instructions

Generator Information *(The generator of oil & gas waste completes this section of the form)*

Organization Name: Write the legal name of the waste generator (e.g., the operating company).

P-5 Operator Number: Enter the operator's unique identification number assigned by the Railroad Commission of Texas (RRC).

Facility Permit Number: Enter the facility's unique identification number assigned

Facility Address: Provide the full address of the facility generating the waste, including the city, county, state, and ZIP code.

Contact Information:

Name: Enter the name of the person preparing the Waste Profile.

Email Address: Provide the email address for follow-up communications.

Phone Number: Include the direct phone number for questions or clarifications.

Generator Signature and Date: The person completing the form must sign and date it to certify accuracy and compliance.

Waste Details *(This section provides specific identification numbers and regulatory codes for the waste stream)*

Waste ID: Assign a unique identifier to this waste stream for tracking purposes.

NAICS (CIS) Code: Enter the North American Industry Classification System (NAICS) code relevant to the operation or waste stream.

U.S. EPA ID No: If required, provide the EPA Identification Number associated with the generator or waste type.

Waste Type: Identify the type of waste being profiled (e.g., spent water-based drilling mud, oil-based cuttings, oil-contaminated soil, or drilling fluids).

Physical Characteristics: Indicate whether the waste is solid, semi-solid, liquid, or gas.

Classification: Specify whether the waste is hazardous or non-hazardous. For non-hazardous waste, ensure this aligns with your waste characterization.

RAILROAD COMMISSION OF TEXAS

Oil & Gas Division | Technical Permitting

Waste Profile

Form EP - 9

(Rev. 04/29/25)

Chemical Characteristics: List key chemical properties such as hydrocarbon content, pH level, salinity, volatile organic compounds (VOCs), total organic halides (TOX), hydrogen sulfide (H₂S), or naturally occurring radioactive materials (NORM).

Constituents: Identify the main components of the waste (e.g., hydrocarbons, salts, metals, organic compounds, produced water).

Basis for Characterization *(Provide the rationale and supporting evidence for waste classification)*

Supporting Documentation: Attach or reference relevant documentation used to characterize the waste, such as lab reports, historical data, or Material Safety Data Sheets (MSDS).

Receiver Information

(The transporter of the oil & gas waste completes this section of the form)

Waste Hauler Name: Enter the name of the authorized organization transporting oil and gas waste.

Waste Hauler Permit Number: Enter the authorized waste hauler permit number.

Disposal Facility Name: Write the name of the facility or organization receiving the waste.

WHP Number: Include the waste hauler permit number (if applicable).

Contact Information:

Email Address: Provide the email address for follow-up communications.

Phone Number: Provide the receiver's contact number for reference.

Receiver Signature and Date: The receiver must sign and date this section to acknowledge receipt.
