Who coordinates these meetings? An email was sent out Tuesday afternoon looking for comment on the Weatherization rule and now Thursday before a major holiday there is an announcement for in person meeting the day after a holiday.

The timing on this seems absolutely terrible. Having a meeting the day after a major holiday doesn't give very many people time to schedule flights to make it to Austin.

I know the technology exists to have these meeting available to webcast, so why not use it? Doesn't make sense to not make a public meeting open to the public that can't attend in person.

All of the items relating to the critical infrastructure topic is becoming more and more frustrating and a giant headache for operators.

Thanks,

Brandon Sloan

Good morning. I have been informed that the workshop will be in-person only and will not be webcast.

Will the workshop on July 5th be made available to people that can't be there in person?
Possibly be hosted via Zoom?

Thanks,

Brandon Sloan
